

PRODUCT OVERVIEW

Heat shrink tubing - a flame retardant polyolefin with a shrink ration of 3:1. An excellent way of marking and identifying wire and cables. Print your information onto the tubing and slip onto the cable: apply a heat source to the tubing so that it shrinks down to create a secure ident. Compatible with the Rhino Pro range of printers.

- 3:1 Shrink ratio
- Resists UV
- Water: chemical and oil resistant
- Withstands temperatures from -55 to 135 degrees Celsius
- Suitable for cable diameters from 1.18mm to 2.33mm
