

Details

The optical MADl card provides the same functionality as the Cat 5 version but on industry- standard SC fibre connectors. Two duplex SC connectors allow dual redundant cabling with automatic switchover. Connection distances of up to 1500m are possible using the standard multimode card, but a version with single-mode optical transceivers is also available allowing distances of up to 10km.

Compatibility:

Vi6 Local Rack / Compact Stagebox / Vi1 / Vi3000 / Vi Stagebox.
