

# Quick and Easy Rack Configuration

The Vertiv VR Rack Accessories offers easy and full configuration of your server racks. This comprehensive line up of accessories for cable management, airflow management, shelves, and support brackets allow users to modify their Vertiv VR racks to suit the needs of their network and support their mission critical needs. Tool-less options allow for quick installation and configuration. Along with the Vertiv VR Rack, the accessories are designed for rapid deployments in high density IT environments.

- Vertiv VR Rack cable organizers provide easy access to the wires installed in your rack.
- Airflow management accessories ensure proper airflow in your rack to help extend lifetime of critical IT equipment. Sliding shelves are perfect for equipment like KVM switches or monitoring equipment with screens.
- Supporting brackets provide extra stability for delicate rack equipment

## FULL COMPLEMENT OF ACCESSORIES

Organized cable arrangement increases the lifetime of cables and makes it easier to work on them for replacements or maintenance. Make sure the cables in your Vertiv VR Rack are properly organized with cable management accessories like cable rings, cable lobster claws, and Velcro straps.

Proper airflow in your rack will help improve the efficiency of your network's cooling system and decrease the wear-and-tear on your IT equipment. Accessories like blanking panels, air recirculation prevention kits, and pass through brush kits will help improve airflow for your Vertiv VR rack.

Secure the placement of critical IT equipment in your Vertiv VR Rack with shelves and support brackets. Sliding shelves for equipment that you need to easily pull out and access in the middle of the rack are also available.

Provide stability to your Vertiv VR racks and increase protection for your critical IT equipment with Vertiv VR Rack anchoring accessories.
