Power and Performance

The high performance XT5315 has a collapsible folding base configurable for maximum viewing flexibility and reduced shipping costs.

A projected capacitive touch screen is standard for the XT5315. Projected capacitive touch offers 10-point multi-touch capability, a bezel-free 100% flat, scratch-resistant surface.

The XT5315 uses powerful embedded Intel™ processors supported by Windows Embedded operating systems. This combination of Intel and Microsoft assures long-term support and availability, critical for long-term location rollouts.

To eliminate additional peripheral power bricks and cable clutter, the XT5315 has an optional powered USB upgrade kit.
